

Press Release

**CY4GATE HAS BEEN AWARDED A CONTRACT WITH A TOTAL VALUE
OF APPROXIMATELY € 2.7 MILLION FOR THE DURATION OF 2 YEARS FOR SOLUTIONS IN
DECISION INTELLIGENCE FOR A FOREIGN INSTITUTIONAL CUSTOMER**

Rome, 27 December 2024 - **CY4GATE (CY4.MI)**, a national and European player in cyber security and cyber intelligence, has signed a contract for a total value of approximately € 2.7 million and for the duration of 2 years with a leading Foreign Institutional customer for the acquisition of technology in the Decision Intelligence field.

The contract refers to CY4GATE Group's supply of technology in Decision Intelligence to support institutional activities aimed at security protection. The system has the task of acquiring, integrating and correlating data from multiple sources to enable the decision maker to take specific courses of action consistent with the acquired operational and information context.

Quipo's technology, a proprietary product with pronounced OSINT capabilities, underpins the Decision Intelligence solutions and is the backbone of the entire project that was contracted, in which AI algorithms are included to raise the performance level of the product itself.

Emanuele Galtieri, CEO and General Manager of Cy4Gate Group, stated: *"The distinctive features of our solutions, in terms of innovation, performance, and ability to adapt to specific customer needs, make our offerings of interest to a wide range of institutional and private users, in Italy and abroad.*

The strong digitalization taking place is bringing out strongly the need to be able to read and interpret the overdose of data to which we are now subjected on a daily basis. We are all convinced of the fact that the "raw material" of this century is data, which can be properly used only if we can effectively extract from it those insights that can enrich information and facilitate decision-making. Our Quipo platform is built precisely around this concept of usability and information enrichment for simple and optimal exploitation of big data for business or institutional purposes. And contracts like today's are here to prove it."
