

Press Release

CY4GATE AWARDED NEW CONTRACTS FOR DECISION INTELLIGENCE AND CYBER SECURITY SOLUTIONS FOR BOTH INSTITUTIONAL, DEFENCE AND CORPORATE CUSTOMERS IN ITALY AND ABROAD FOR A TOTAL VALUE OF APPROXIMATELY €1.3 MILLION

Rome, 28 May 2025 - **CY4GATE (CY4.MI)**, a national and European cyber security and cyber intelligence player, announces the signing of new contracts **worth a total of around €1.3 million**, for the provision of advanced technology solutions. The contracts confirm the market's growing and ongoing confidence in the Group's ability to respond to the latest challenges in digital protection and strategic data analysis.

The planned supplies include both **software licences** and **professional services with high added value**, aimed at the activation, customisation and full exploitation of the implemented technologies. Among the contracted solutions, the **modern SIEM RTA** stands out, particularly in its vertical declination for **OT Security**, designed for the monitoring and protection of industrial environments and critical infrastructures.

This technology, based on an advanced architecture for **detecting complex threats and attack chains**, represents a pivotal element in the cyber defence strategy of organisations operating in highly exposed contexts, where operational security and service continuity are top priorities.

These new contracts confirm not only the **soundness of CY4GATE's technology offering**, but also its increasingly central role in accompanying businesses and institutions in the process of digital evolution and in building cyber-resilient ecosystems.

Emanuele Galtieri, CEO and General Manager of Cy4Gate Group, stated: *"Customers recognise our ability to provide advanced solutions in line with the highest technological standards, as well as a customer intimacy that facilitates the integration of legacy products with the new products we offer for digital security and strategic data exploitation. We operate in an environment where timely decision-making and the protection of critical infrastructures have become essential factors of resilience and competitiveness. We are proud to contribute, with our technologies and expertise, to supporting businesses and institutions in strengthening their cyber posture and effectively addressing an ever-changing threat landscape."*
