

PRESS RELEASE

Circle Group announces the signing of two contracts totaling approximately €250,000 for the development of digital systems to support rail-port intermodality

Milan, June 3, 2026

[Circle S.p.A.](#) (“**Circle Group**” or the “**Company**”) - an innovative SME listed on the Euronext Growth Milan market, and the parent company of the group of the same name specialising in process analysis and the development of solutions for innovation and digitalisation in the port and intermodal logistics sectors, as well as in international consultancy on Green Deal and energy transition issues, announces that the signing of two contracts with a total value of approximately **€250,000** with leading Italian intermodal partners. The agreements cover development activities and management services as part of a co-funded project, with a particular focus on enhancing the functionality of the **Extended Port Community System** and strengthening digital tools to support port and intermodal rail management.

Thanks to the Extended Port Community System, Mediterranean ports can benefit from real-time digital interoperability among companies, the rail ecosystem, freight forwarders, logistics operators, customs operators, and the entire port community, contributing to the creation of an increasingly integrated logistics system that leverages the synergies of data collected from each operator, forming a shared resource.

The projects specifically involve the evolution of the **Milos® Rail Ecosystem: Rail Dashboard, Rail Connector, Rail Interoperability** modules, with the aim of improving ease of use, readability, and operational effectiveness for all end users. These initiatives are part of the digitalization of port and intermodal hubs, promoting system efficiency and the optimization of documents related to arrivals and departures.

The agreements also involve the activation of scalable components and a data connector for railway OCR recognition (primarily the automatic reading of wagon and container codes), which will enable the collection and sharing of information related to rail transit, facilitating communication among operators by leveraging data collected at the rail gate.

“These new contracts confirm Circle Group’s role as a leading technology partner for the digitalization of port and intermodal hubs,” commented **Luca Abatello, President and CEO of Circle Group**. *“The evolution of Extended Port Community Systems and the integration of*

advanced tools for managing rail flows are key drivers for increasing efficiency, interoperability, and service quality in complex logistics systems. We are proud to contribute to these projects with leading Italian intermodal partners as part of the broader path of innovation and modernization supported by our ‘Connect 4 Agile Growth’ business plan.”

The project further strengthens Circle Group’s position in the port and intermodal digitalisation market, confirming the Group’s ability to support operators and institutions in developing innovative, interoperable solutions designed for the proactive management of logistics processes.

Circle Group uses the [1INFO](#) system to disseminate regulated information.

Founded in Genoa in 2012, Circle S.p.A. is the Innovative SME leading Circle Group, a company listed on Euronext Growth Milan since 2018 and specialized in the analysis and development of solutions for innovation and digitalization in the port and intermodal logistics sectors, as well as in international consultancy on Green Deal and energy transition topics.

The Group includes the software houses Info.era, NEXT Freight, eXyond, Cargo Start, Qmap, the consulting firms Magellan Circle and Magellan Circle Italy, NEXT Customs, as well as the affiliated company ACCUDIRE.

In the field of digital innovation, the Milos® Intelligence platform integrates advanced technologies such as AI, simulation, and Digital Twin to support decision-making processes and the digitalization of systems, through solutions like the Extended Port Community System, MasterSPED®, Milos® TOS, Milos® MTO, Milos® TFP, Milos® Global Supply Chain Visibility, and StarTracking. Complementing the offering, Federative Services (cloud-based) enable a more efficient migration towards digital business models.

Through Magellan Circle and Magellan Circle Italy, the Group is active in Brussels and across Europe in advocacy activities with the European Institutions, supporting public bodies and companies with services in Strategic Communication and Advocacy and EU Funding Accelerator, with a focus on the Green Deal and energy transition.

With Cargo Start, specialized in technological solutions for air cargo, Circle has strengthened its offering in a strategic segment of its industrial plan. eXyond oversees advanced infomobility services (InfoBlu New Gen), focused on real-time traffic information products and services and big traffic data analytics, also for freight and logistics, as well as advanced telematics solutions for road transport (Kmaster) and Gate Automation solutions. Circle also holds a 20% stake in the innovative startup ACCUDIRE, which offers a collaborative platform for document management along global supply chains, starting from e-CMR and e-DDT (electronic consignment note). With NEXT Customs, the Group develops digital services for customs optimization, contributing to the harmonization of processes in line with the strategic directions of Connect 4 Agile Growth.

Circle S.p.A. has been listed on the Euronext Growth Milan market of Borsa Italiana since October 26, 2018 (alphanumeric code: CIRC; ISIN code ordinary shares: IT. 0005344996).
