

CFO SIM APPOINTED TO EXECUTE THE SHARE BUY-BACK PROGRAMME

Euronext Growth Milan: YKY | ISIN: IT0005573966

Casamassima, 22 June 2026

Yakkyo S.p.A. (hereinafter also the "Company"), an innovative SME engaged in developing integrated software solutions for the dropshipping process and the wholesale sale of third-party products, and which has developed an artificial-intelligence-based suite to assist its clients in their online sales activities, further to the launch of the buy-back plan announced on 28 April 2026, hereby announces that its Board of Directors, acting under the authorisation granted by the Shareholders' Meeting on 9 February 2026, has appointed CFO SIM S.p.A. as the intermediary mandated to carry out the purchases on the market for the entire duration of the programme. CFO SIM will take its decisions regarding the purchases on a fully independent basis, including with respect to the timing of the transactions, in compliance with the parameters and criteria defined in the agreement, as well as with the applicable legislation and the aforementioned resolution of the Shareholders' Meeting.

Issuer Profile

Yakkyo S.p.A. is an innovative SME that, on behalf of its e-commerce clients, manages the sourcing, storage and logistics of goods worldwide through its proprietary technology platform, Yakkyofy. The company stands out as the only one of its kind in Europe, developing integrated software solutions for the dropshipping and wholesale process through the use of artificial intelligence. A dedicated research and development department has been established within the company, with the aim of further optimising process automation. Since 2022, the company has focused its research and development on AI technologies, leading to the launch of Pandarocket.ai. This suite makes it possible to optimise the various processes related to online sales, from comparing offers and prices of similar items, to creating product descriptions, to editing images and videos, through to the complete automation of marketing campaigns. Yakkyo's objective is to make e-commerce more efficient and accessible by simplifying the entire process of purchasing and shipping products from all over the world, thereby enabling its client companies to focus more on sales and marketing activities, while also offering a catalogue of over 21 million products. Through Yakkyofy, users have control over the entire process of purchasing, selling and shipping orders within a single platform, monitoring order status in real time and managing returns and refunds in a simple and straightforward manner. In addition, they can benefit from customised solutions tailored to their specific needs.
