PRESS RELEASE

MARE GROUP: €8.3 MILLION FOR UAV PROPULSION UNITS

– Three-year framework agreement with a new Italian client in the Aerospace & Defence sector

– Design, prototyping and production of more than 6,000 engine kits

Salerno, 28 July 2026

Mare Group S.p.A. (ticker **MARE.MI**), an engineering company listed on Euronext Growth Milan and operating in Italy and abroad in innovation through enabling technologies ("**Mare Group**" or the "**Company**"), announces that it has signed on 27 July 2026 a **three-year framework agreement with a total value of approximately €8.3 million** with a new Italian client operating in the Aerospace & Defence sector.

The agreement covers **engineering design, prototype development, the machining of components and the supply of more than 6,000 "engine kits"** for uncrewed aircraft. Revenues are expected to be distributed evenly across the three financial years.

The agreement is the **first commercial result of the Aerospace & Defence platform** that Mare Group has built through the 2026 acquisitions, and it puts that manufacturing capacity to work from the outset: design, prototyping, machining and qualification of the components all remain within the Company's industrial perimeter.

Luigi Di Palma, General Manager of Mare Group, said: *"Propulsion is a critical component in the uncrewed systems supply chain. With this agreement we move deep into a strategic industrial cycle, bringing design, prototyping and production under a single strategic lead. The contract will be executed with the involvement of CTMAVIO, which has just been acquired*[1]*, giving immediate effect to the industrial and commercial synergies expected from the integration".*
