PRESS RELEASE

DE NORA AWARDED CONTRACT WORTH ABOUT EURO 30 MILLION FOR A WATER TREATMENT PLANT SERVING A SEMICONDUCTOR FACILITY IN SOUTHEAST ASIA

Milan, 4 September 2026 – Industrie De Nora S.p.A. ("**De Nora**") – an Italian multinational listed on Euronext Milan, specialized in electrochemistry, water treatment systems and sustainable solutions – through De Nora Singapore Pte. Ltd. (formerly BW Water Pte. Ltd., recently acquired by De Nora), has been awarded a contract by a leading international player to build an industrial wastewater treatment plant for a new semiconductor facility in **Southeast Asia**.

The contract, valued at about **euro 30 million**, covers the design, procurement, delivery, installation, testing and commissioning of a Wastewater Treatment Plant (WWTP) for the treatment and recovery of wastewater generated by production processes, at a **new semiconductor** advanced packaging **facility**.

This contract further strengthens the growth trajectory of the new **Integrated Water Solutions** (**IWS**) line, which currently consists of the former BW Water business[1] recently acquired by De Nora. The award enhances revenue visibility for the coming years and is fully aligned with De Nora's strategy to expand into high-growth markets through an integrated end-to-end offering tailored to specialized sectors with demanding water treatment requirements, including semiconductors.

Project execution is expected to commence in 2026, with final handover scheduled by the end of 2028.

Paolo Dellachà, CEO of **De Nora, commented**: *"Just a few months after BW Water joined the De Nora Group, we are pleased to announce this new water treatment project in the semiconductor segment. The acquisition of BW Water, which now forms our **new Integrated Water Solutions (IWS) line**, further strengthens the Group's ability to serve strategic industrial sectors with high growth potential through end-to-end integrated solutions and a strong global presence, in line with our medium- and long-term growth strategy."*

***

Industrie De Nora S.p.A. is an Italian multinational company founded in 1923 and listed on the Euronext Milan stock exchange. A global leader in electrochemical processes and technologies for water management, it provides products and services that enable industrial processes in the chlor-alkali, electronics, battery, water treatment (both municipal and industrial), and green hydrogen sectors. With an operational presence across multiple regions–including the Americas, Europe, the United Arab Emirates, and Asia–De Nora delivers customized solutions, effectively and reliably meeting market demands. Committed to ESG principles, the company integrates environmental sustainability and social responsibility into all its activities.
