PRESS RELEASE

UNIDATA WINS TWO TENDER LOTS WORTH APPROXIMATELY € 18 MILLION FOR THE FIBRE OPTIC NETWORK SERVING ROME'S POWER DISTRIBUTION GRID

THE AWARD COVERS THE FIBRE OPTIC CONNECTION OF 3,433 SECONDARY SUBSTATIONS AS PART OF ARETI'S FI.O.R.E. PROJECT

Roma, 12 November 2026 – Unidata S.p.A. (UD.MI) (the "Company"), a telecommunication, cloud and IoT services operator, listed on the Euronext Milan market – announces that it has been **awarded two lots of the tender issued by Areti S.p.A.**, for a total value of approximately **€ 18 million**. This new contract is Unidata's largest award to date based primarily on the use of its existing fibre optic network.

The award is part of **Fi.o.r.e.** (Fiber Optic for the Electricity Network) **project**, aimed at creating a telecommunications infrastructure dedicated to monitoring, remote control, and automation of Rome's electricity distribution network.

Unidata will **design**, **build**, and **maintain** the **fibre optic infrastructure**. Specifically, **3,433 secondary substations** in Rome's electricity distribution network will be connected thanks to Unidata's proprietary fibre optic infrastructure, which as of 30 September 2026, spanned over 8,900 km.

The project will be completed over a maximum period of **36 months**, with activities concentrated in 2027. This, combined with recurring revenues accounting for over 65% of total revenues, will contribute to strengthening visibility towards the 2027 targets. The contract also includes management of the infrastructure's maintenance until 2049.

Renato Brunetti, Chairman and CEO of Unidata, commented: "*This award confirms the strategic value of our fibre optic network, which we are now putting to work on an essential infrastructure for Rome. It is the largest contract we have secured for the reuse of existing networks and demonstrates how digital infrastructure can make even primary services more efficient and resilient. We are proud to support Areti in the Fi.o.r.e. project, contributing to the creation of a smart grid that will bring tangible benefits to citizens, and to resolutely continue along the path outlined in our business plan*".
